INFINITY LOOPER 3

Pigtronix Infinity 3 is a full-featured stereo looping pedal with over 3 hours of recording time on two independent loops. Innovative workflow options include series or parallel looping with a multiplier function and comprehensive MIDI control.

MAP: \$419

UNIVERSAL REMOTE

Universal Remote is a passive controller with three momentary footswitches that is compatible with a wide range of digital effects pedals from Pigtronix as well as other top manufacturers, allowing you to explore the full extent of your most robust effects.

MAP: \$79

INFINITY LOOPER 2

Infinity 2 is a hi-fi stereo looping pedal with two independent loops and a streamlined user interface designed to be the ultimate writing, arranging and performing tool.

MAP: \$199

CONSTELLATOR

Constellator is an analog delay pedal offering up to 600ms of modulated echo and two selectable Feel modes. Offers superior overall headroom as well as glorious saturation when pushed into self-oscillation. Mythology in the stars.

MAP: \$179

MOON POOL

Moon Pool is an analog phase shifter and tremolo with independent speed controls and the ability to change the rate of one or both of the effects in either direction, based on how hard you play. Get lost in the slush.

MAP: \$179

OCTAVA

Octava is an all-analog frequency-doubler with a passive Filter control, front end Drive, octave Blend, and switchable Fuzz circuit. Note: Can be absolutely devastating.

MAP: \$119

SPACE RIP

Space Rip is an analog guitar synthesizer featuring pulse width modulated (PWM) sawtooth and square wave voices in multiple octaves with zero-latency pitch and dynamics tracking. Sounds like tearing the fabric of spacetime in half.

MAP: \$179

PHILOSOPHER'S TONE

Philosopher's Tone is an optical compressor/sustainer featuring independent Volume and Sustain controls, a parallel Blend knob for clean signal, and a Treble control providing up to a 6db cut or boost at 2kHz. Golden.
